

Akinjury

Your friendly first-aid assistant

According to Singapore Statistics, the number of elderly will reach **1 million** in 2030, **double** from what it is in 2010.

If an elderly were to get injured at home, who would treat them?

Our solution? Akinjury, a 100% hands-free first-aid bot

① How to use Akinjury

- 1 Say 'start akinjury'
- 2 State your intent (identify or treat)
- 3 Respond to the prompts (symptoms, location, pain level)
- 4 Receive an all-knowing reply

☑ Features

- Quick and simple injury diagnosis
- Self-created DynamoDB database containing 43 common injuries
- Detailed step-by-step treatment advice (in development)
- Fast, hands-free, and professional medical guidance
